Product Requirements Document (PRD) – Uniplug

1. Overview

Product Name: Uniplug
Type: Multi-Tenant eCampus Management Platform
Purpose: To provide a centralized, scalable platform for universities to manage academic, financial, and hostel operations, while offering students, parents, applicants, and external organizations an integrated ecosystem.

Goals:

- Streamline university operations
- Improve applicant/student experience
- Enable multi-tenant scalability
- Ensure data integrity, security, and auditability

---

2. User Roles

1. Applicant / Prospective Student
2. Student
3. Parent / Sponsor
4. Lecturer / Academic Staff
5. University Admin / Tenant Admin
6. Finance Officer
7. Hostel Manager
8. External Organization Admin
9. Super Admin (Platform Level)

---

3. Functional Requirements

3.1 Applicant

- Sign-up/login and profile management
- Browse universities and public programs/scholarships
- Apply for universities and programs
- Upload documents

- Track application status
- Pay application fees
- Download printable receipts

3.2 Student

- Complete and verify profile
- Register for courses (core/elective with lecturers displayed)
- Pay tuition, departmental, hostel, and other fees
- Download printable receipts
- View grades, GPA, and academic records
- Hostel booking and renewal
- Notifications for deadlines, results, and payments

3.3 Parent / Sponsor

- Sign-up/login
- Link to unlimited students
- Monitor academic progress
- Make payments on behalf of students
- Access printable receipts
- Monitor hostel bookings

3.4 Lecturer / Academic Staff

- View assigned courses
- Access student lists with levels, carry-over indicators, and progress
- Enter continuous assessment scores
- Enter exam scores
- Automatic grade and GPA computation
- Submit results for approval
- Receive notifications

3.5 University Admin / Tenant

- Manage academic sessions and semesters
- Configure faculties, programs, and courses
- Assign lecturers to courses
- Approve/reject student applications
- Approve results
- Configure fees
- Manage hostel setup and occupancy
- Publish scholarships and programs
- Generate reports (admissions, financial, academic, hostel)
- Broadcast notifications

3.6 Finance & Payment

- Online payment integration
- Tuition, hostel, and other fee payments
- Printable receipt generation
- Financial dashboards
- Audit logs

3.7 Hostel Management

- Real-time hostel, room, and bed-space availability
- Bookings and renewals
- Occupancy tracking

3.8 External Organization Admin

- Publish public/private programs
- Review applications
- Track beneficiaries

3.9 Super Admin

- Tenant onboarding and configuration
- Assign university admins
- Monitor platform-wide usage and activity logs
- Multi-tenant governance

---

4. Non-Functional Requirements

- Multi-tenant isolation
- Scalability to support multiple universities and thousands of users
- Secure authentication and role-based access control
- Payment gateway integration with secure transactions
- Printable receipts with audit trails
- High availability, especially during peak registration and payment periods
- Data privacy compliance
- Notification system for users

---

5. System Workflows

- Applicant → Admission → Student conversion
- Student course registration, fee payment, hostel booking, results viewing
- Parent/Sponsor linking and payment on behalf of students
- Lecturer course management and grading
- University admin operations (sessions, programs, courses, lecturer assignments, approvals)
- Payment processing and receipt issuance
- Hostel booking and renewal management

---

6. Success Criteria

- Fully functional MVP deployed for initial tenant(s)
- Accurate academic, financial, and hostel data management
- Multi-user roles operate correctly with defined permissions
- Payments are processed and receipts issued instantly
- All user flows verified and tested
- Scalable architecture to support additional universities

---

7. Constraints

- MVP does not include AI recommendations, offline mobile mode, social features, or multi-currency support
- Limited analytics and reporting in MVP
- Refunds and adjustments handled manually in MVP

---

8. Notes

- Subsequent phases will add advanced analytics, integrations, mobile offline features, social engagement, and automated notifications for scholarships and programs.
- All workflows must adhere to tenant isolation and data privacy rules.
